

ANCHOR POINT BOND FUND

THE **ANCHOR ADVANTAGE**

The Anchor Point Bond Fund (APBF) provides an appropriate investment for institutions and high-net-worth individuals desiring to minimize volatility, while striving for an estimated 6-7% income stream in addition to several annual percentage points capital gains, for a target of 9% annualized average return, which is supported by our 15 year track record in managing bonds in separately managed accounts.

Low-yielding government bonds do not provide adequate revenue to allow institutions and individuals to meet their funding obligations. The APBF meets this need.

Institutions and retired high-net-worth individuals are seeking a steady income stream without experiencing the erratic fluctuations seen in the markets.

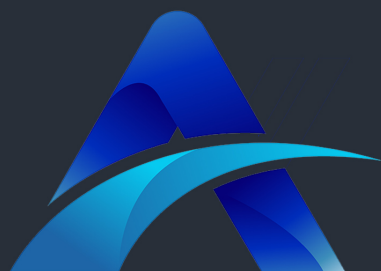

The Anchor Point Bond Fund uses the Zenith-Nadir Stoichiometric Rating Scale to provide:

▶ **STABLE INCOME :**

APBF is a stable-income bond fund targeting a 6-7% income stream.

▶ **LOW VOLATILITY :**

Volatility is decreased by using proprietary trading techniques developed during two decades of investing, including three major downturns.

ANCHOR INVESTMENT METHODOLOGY

- ▶ IDENTIFY HIGH-INCOME-GENERATING BONDS
- ▶ COUNTERBALANCE AGAINST EXTREME VOLATILITY
- ▶ LOCK IN PROFITS BASED ON VALUATIONS
- ▶ TARGET 6-7% INCOME PLUS 2% CAPITAL GAINS FROM PROPRIETARY TRADING TECHNIQUES
